Work EXPERIENCE

PostDoctoal Scholar, NSF AI-Edge Institute, The Ohio Satte University   Summer 2024-present

- Currently working on the development of Learning algorithms for achieving fairness in Multi-agent Reinforcement learning.

Research Assistant, Real-time Networking Lab, Auburn University   Fall 2018-present

- Developed optimal sampling policy for a class of stochastic processes and low-complexity algorithms for remote estimation by utilizing tools from probability theory, optimization, and stochastic processes.
- Designed efficient Whittle index scheduling policies for multiple sensors monitoring multiple diffusion processes.
- Investigated different safety-critical systems for designing scheduling algorithms to reduce loss due to the unawareness of the surrounding situation. Achieved up to 100 times performance gain for the developed policy.

Teaching Assistant, ELEC 2120 Signals and Systems, Auburn University   Fall 2021, Fall 2022, Spring 2023

- Conducted lab lectures on linear Systems, convolution, Fourier series, Fourier transformation, and Laplace transformation both with TIMS module and MATLAB.
- Graded the homeworks, quizzes, and labs for approximately 55 students.

Teaching Assistant, ELEC 3810 Fundamentals of Electrical Engineering, Auburn University   Spring 2022

- Graded the homeworks, quizzes, and exams for approximately 60 students.
